Mission to Kenya, Africa

Third Day of Conference in AM at Naitiri, Nazareth

Tony:

Today we ministered and taught in the prophetic. Wow, these folks really soaked it up. As I began to teach about words of knowledge I asked the team members if they had a word. I wanted them to explain how they had gotten the word. First Vee and then Caroline explained how they had received the words they got. I love Holy Spirit demonstrations as lives are always impacted. A whole bunch of people responded and they were ALL touched!

As the people began to give testimonies of their healings, more people came up just because God was moving. **I was asked to pray for a young boy that was totally deaf and a pastor that was deaf in one ear. Both were miraculously healed and received full hearing.** The little boy's mother was overjoyed to say the least.

We then proceeded to pray for a release of each person to enter into a prophetic experience with The Lord and receive words of knowledge. As they began to come up to share what they had seen/heard, there was a whole line of just women. Strange! They shared all manner of exhortations, visions, and words of knowledge. It was a good time of training as they again got to pray for each other and see God move! There were lots of God testimonies and at the end we asked for those that missed the impartation prayer to come and again it was very powerful. I had all I could do to stand as people were powerfully touched. I am getting quite good at swan diving people to the floor.

Thank you Jesus for all you have accomplished today!

Vee:

I received a word of knowledge this morning, when I felt pain in my lower abdomen. I sensed it was the ovaries and/or female

reproductive organs. When the word was given at the conference there was complete quiet and not a movement for about 1 minute. Then a young girl came forward and then about 5 more right behind her. The first one told me she had restricted fallopian tubes and had pain in her abdomen. She requested prayer and received it. Hallelujah! The second woman I recognized as I'd prayed for her a couple of days ago, she had not been able to carry a child yet. Today, she just wanted more blessing to conceive. The third lady had had her tubes tied and had a dream someone was telling her that she had done wrong and needed to repent. Then in another dream she had a woman brought her a daughter. I sensed a spirit of self forgiveness. Although, she had already confessed to the Lord, she still needed to forgive herself and so I encouraged this and expressed the Father's love. I told her I believe the adversary was trying to make her feel guilty so that she would not seek a relationship with the Lord. And if she asked believing, she would receive. I also shared about Sarah being barren for 90 years. She seemed to feel better. In addition, she also had the pain in the abdomen and was healed. Praise God. The fourth lady had back pain and was very shy. I was led to lead her through salvation and then she received the healing in her back. A new sister!!

Then, as soon as the conference was over, a pastor came to me and Tony and said he dreamed of me last night holding my stomach and was in shock when he saw me come forward today and give this as a word of knowledge. Thank you Lord for this revelation and confirmation. WOW!

Harvey aka Moshe:

The days keep getting better and better. Yea God!!!! Many more testimonies and God stuff. When we got to prayer time I prayed for a girl that had boils under her arms and stomach pain. After I prayed she said the pain from the boils got worse and the pain in her stomach started moving around. I guess you could call this a text book case of deliverance need. P. Tony guided the interpreter

in taking the girl through deliverance. **After she was delivered all the pain was gone so we had her put her hands where the boils were and pray and she said the boils began to shrink and then disappeared.** Praise the Lord!! I also prayed for kidney stones in a man who came for prayer. At least that is what I believe was the problem. The man said he had a blockage and pain by the kidney. What ever it was God touched him and healed him. It is so awesome to know God knows what is needed and He always has the situation covered. There was also a woman with neck and ear pain and two women with headaches that I got to pray for and watch God touch them and heal them. It is so incredibly exciting to watch God work.
