Open Air Crusade held at End Time Harvest Church

Tony:

Thank you intercessors. There were many more people here tonight, having heard what Jesus was doing, they came. As praise and worship got started, people were going up to give testimony and we were called into the building. When we went in and saw a woman lying on a mat on the floor. We asked the ladies to find out what was wrong. It appears this lady had a baby sometime last year and right now looked like she was 9+ months pregnant. The doctors told her that she had an incurable disease and would die shortly. She had to be carried to this place from long distance. She was not able to lift her head off the mat. We began to pray under Holy Spirit's direction. After a short while she was able to sit up and the pain that was in her body had made a complete trip all around her body until it left her. She felt encouraged that her healing was happening. She was a lost lady, but now wanted to receive the Lord because of what was happening in her body. Tomorrow will show the results.

Check this out: A lady standing in front of me that is totally blind in her left eye. Her eye is all white with a very thin ring of black all around. As we began to pray for her everything was pitch black (not even light coming in that eye) and she said "something is happening!" The thin black line around her eyeball started moving in taking over the white part. She said "I am beginning to see light". The black kept moving in until there was just a small black dot in the middle of her eye. When it came to that point, she said "I can see perfectly now!" Wow, that was amazing Lord!

A lady stood before me saying she had something lodged in her eye and no one could get it out. It had caused great inflammation and pain. She said she could feel part of sticking out with her finger. We prayed and amazingly all the discomfort and burning stopped. She tried to feel the thing that was imbedded in her eye and couldn't find it. Hallelujah!

A lady that came claiming she was tested HIV positive asked me to pray for her brother that was at home desperately sick. I took her hands and imparted the anointing to her and told her to go home and lay her hands on her brother. I then asked her if she would like to see what she got. She said yes. In between taking videos, I spent the rest of the night working with this woman training her in prayer ministry. Wow, did she get it big time. I stood with her as she saw all miracles happening thru her hands. Not even one required a second prayer.

A lady gave testimony of how she was at last night's crusade and she asked for prayer for her sick family. She stood up tonight and gave testimony of how when she went home her family was all restored and no one sick.

A lady couldn't breathe, couldn't talk, could barely hear anything, her legs were so bad she needed help to walk and in a moment tonight she was yelling out praises, taking deep breaths, her ears were totally opened and she was able to run. Wow, can you imagine what it must have been like to be in her previous condition and then made totally well. Glory to God!

A man with a frozen neck from some kind of accident came. He said no hospital could help him. Pain all day, everyday. While being prayed for he said "I feel it leaving, it is leaving, it is gone!" Then he turned his neck from side to side just like it was new. Hallelujah!

A young lady said that if she sits down, when she gets up, she cannot walk without help. Only after a long time of being up can she even begin to walk on her own. It has been that way for a long time and has made her unable to do the most basic things of life. After prayer, she tested out what God had done and got up and down quickly from sitting and walked with great strength. Thank you Jesus.

Two woman one after the other with paralyzed hands. They were totally unusable. The expression of joy on their faces as life flowed back into their hands as they were completely restored. They were so thankful. To see first one finger, then another, then the wrist all begin to move and the shocked look on their faces was wonderful.

Fredrick:

There was way more activity of heaven in this place tonight than we could possibly ever report about. Only eternity will tell all that happened.

An elderly man came and said that he couldn't see clearly. When he tried to see it was like smoke. I asked the Lord to increase the light and asked him what do you see. I kept saying, "I am seeing clearer and clearer and clearer" until he said "I can now see perfectly" Glory to God. All who knew him were amazed at the powerful love of God.

A young woman came with a stomachache. She said that she had something that had swollen up in her stomach. She said, feel this and I looked and it was a big tumor. As I began to pray she started screaming, yelling "oh, the pain is so bad, it hurts so bad" Then all of a sudden she said "oh my God, it is gone, feel this, look at me, it has disappeared" What an amazing sight to see, right before our eyes.

A man came that was a retired army officer said that he had a big problem of drinking. When he came he was already drunk. He said that he wanted to leave drinking and to receive Christ as his personal savior. I told him how Holy Spirit would help him in the time of temptation. I prayed and Holy Spirit came upon him and again I saw this man become completely sober, instantly. He was absolutely amazed at what had just happened to him. He received the Lord.

Many back problems, chest problems all healed INSTANTLY.

A pregnant woman came who was separated from her husband. Her husband spoke a curse over her that she would never give birth. We led her into confession renouncing all those curses. She felt something happen inside of her womb and said when I give birth I will bring the child to the church to show what God has done.

Casey:

A few years ago if someone were to tell me that I was going to be out in an African bush village preaching, I would have thought they were crazy. Now I tell everyone I'm going to Africa to preach in a bush village and they say I'm crazy. Ok who is the crazy one here?

The crusade was totally awesome this afternoon/evening. Again the praise and worship was rocking and there were so many people dancing from young to old. The dust was flying and so thick it was almost too hard to breath, but that didn't stop anyone. In the middle of worship Tony and I got pulled into the church building to pray for a very sick lady. She was in real bad shape and all she could do is lie on a mat. After some prayer she was able to sit up, but the pain was moving all over her stomach. It was on the move as we kept chasing it. To make a short story we won in the name of Jesus. The pain was all gone now so we let her rest.

Tony had me give the message tonight and I had a lot of fun doing it. I could feel the Holy Spirit speaking through me, and the crowd was hanging on every word. While I was preaching, one lady got healed just by the word and her hunger. That was awesome. When I finished we gave out some words of knowledge. I had one for blind eyes and the first lady that I prayed for was totally blind. She lost her sight when she was eight years old. This was a word given so I knew she was going to receive her sight back. I placed my hands on her eyes and prayed fully expecting her sight right away. Well I wish that's the way it happened, but God had other plans. I prayed several times and nothing was happening. She began to cry and then she shouted out for Jesus just like I preached earlier. While she was still crying I placed my hands back over her eyes and started to pray again. We asked if she could see anything and her answer was still no. I asked if she was feeling something in her eyes and she said it feels like fire is on my eyes. Ok now I know something is happening so I kept praying for her. Each time now there was a small change in her sight. I prayed for quite a while, but it was worth it because in the end her eyes were fully restored. Now she was crying for joy. God is Good.

I also prayed for a young girl that was blind in her left eye. Her eye popped open after the first shot and she too began to cry. They are so thankful here God is their

only chance for healing. I also prayed for two deaf persons that were totally healed instantly. There are so many more testimonies that I could share. The crowd was huge tonight and God was there being God. There were hundreds and hundreds of people touched by God tonight. Tomorrow night is going to be a blast. Thank you to everyone covering us and our families with prayer. Blessings
