Day 1 Leaders Conference Holy Ghost Ministries Building

Tony:

Thank you prayer intercessors, we are being greatly blessed by your prayers.

Where there were only a few people there in the beginning, the praise leader asked if there were any testimonies. An older lady came up and I am listening to her say she has very bad eyes and cannot see, had had a terrible bad back for years, a very bad heart and walks only with extreme pain. I thought what kind of testimony of this? Then she said she has gone from church to church for years getting prayer but none has ever helped and she has stayed away from church. But last night she heard that people were being healed and she thought she would give it one more try. I said, hey, this lady NEEDS to be healed. We prayed and she was INSTANTLY healed as everyone watched. She said she could see perfectly now, bend twist and run normally. She took off running to the front of the church and back again. Then she said, "Today, I want to be saved" and we prayed. Wow, thank you Lord.

Today was the first day of the conference. The number of people tripled from the time we started the teaching until the end. We finished up after about 4 hours and they said "teach us more" so we gave them more. We ended up with a 6 hour meeting. The hunger is very great.

The demonstrations are the part that really get them. We began with a word of knowledge for stomach problems, about 30 people, all woman came up. We then asked for some volunteers to pray. A few came and we worked thru with them the prayer for these woman. At first we had to calm them down and get them to relax in the Lord, to listen to Holy Spirits voice, then they saw some action.

The people that were up front now were there for stomach problems. So, this is very typical. The first lady said, "I cannot see and I have tumor in my side!" OK, so we prayed. First her eyes opened, but she had some shadows. Prayed again for 10 seconds and the shadows had left. We asked about the tumor, she kept feeling to

try to find it, but couldn't. She said it is gone. Then she said, But my back is also bad, then took off running to show what God had done!

A lady said that it feels like for a long time it feels like there are insects in the inside of her eating her up. We prayed and the insects started intensifying inside, then all of a sudden she started pressing all over her stomach and said they have left me, they are gone! I am free!

Another lady could not see that I was a white person but after prayer she realized that I was a white man and said "oh my God, a masungo!"

Another lady with ulcers. Now I know what this pain is like as I suffered with those when I was a teenager. When she put her hands on the spots where the ulcers were, the pain would intensify. After prayer, no matter where she put her fingers she could no longer find a sensitive spot. I am free she said.

Another woman had pain radiating all around her abdomen, during prayer it kept moving faster and faster until it left her body.

How about this: A deaf mute young man just walked into the middle of the meeting and pointed to his ears and mouth and shook his head like I am a deaf mute. Some of the men prayed and after just a few minutes his ears were opened and he was speaking. Wow.

A lady was standing in front of me and I was without interpreter for a moment. I asked her what was wrong with her. She was rubbing her ear. I thought she had ear problems, I was getting ready to pray for her ear when the interpreter came back and found out she had back problems. You know, I believe Jesus would have healed her anyways. She did get her back healed.

Fredrick:

A lady came suffering from cancer. She has been in several hospitals, even the biggest in the capital city. They detected that it was cancer, but there was no way they could help her. We prayed 3 or 4 times, but the sickness was just moving from one part to another. We chased that spirit out and she confessed a renunciation of that disease. In her stomach she had tumors all over her that

could be felt on the outside. As we prayed they started to dissolve until they all disappeared. She rejoiced in the miracle she had received.

A woman with a tumor and a bad eye that she could not see out of. We prayed for the tumor and she said it was gone. She came back a little while later and said that the tumor has come back again IN A DIFFERENT spot. That is clearly demonic. We prayed and cancelled that work of the enemy and the tumor now totally disappeared and did not come back. Her eye was also opened and she could clearly now see. Thank You Lord!

A woman had a very painful arm up to her wrist. She could not move or lift it up, it was so painful. I looked at her and just felt God say “tell her I have healed her, just check it out!” She did and found herself with an INSTANT miracle. Glory to God!

Casey:

The morning training session went well and several pastors and church leaders got to pray for some sick people and see them healed threw their hands. I was working with this one pastor and just kind of coaching him along. He was excited to see what happened as he used the authority he never knew he had. The first person we prayed for was a woman that was having bad stomach pain. I had him lay his hands on her stomach and pray with authority and wouldn't you know it the pain left instantly. He said can I do this again? Like he needed to ask I guess he thought since we came all the way from America we wanted to do all the praying. I told him this is why we are here so have at it. The next woman that he prayed for was having a hard time seeing, hearing, and a bad headache. He looked like where do I start so I told him to begin with the easiest one to pray for first and work your way to the hard one. Well the one he thought was going to be hard to believe for. So he prayed for her ears first, I didn't think he was going to start there, but he was going for it. After the prayer she said she could now see good and everything was real clear. What? Again this ministry is a mystery and it's all up to God how He is going to heal. So again he prayed for the ears and this time

her headache went away. So he prayed for the ears again and this time only one opened. He started to laugh and said I like this and prayed for her other ear. When he finished both ears were open now, no headache, and her eyes were healed. Praise God. Another woman that came for prayer was having pain in her legs and if she was to squat down she couldn't stand back up without help. Again after a quick prayer she began to jump up and down and she even squatted several time to prove she had been healed. I guess you could say the Pastors were having a grand time this morning. Thank you to everyone that is covering us in prayer. Blessings 😊
