

Mission to Africa

January 25, 2012 Second Day Outreach:

Tony:

Thanks to all those that are praying, even a brief thought lifted up to God is having eternal impact, so keep it coming. Great Kingdom work is being done these days. One of the pastors with us is from the area of last year's mission. He is telling us that his whole region was predominately Muslim and the church was small and ineffective until we got there. He says that now, one year later, there are many more Christian churches and the ones that were there and struggling have grown huge and have now become sending and planting churches. All Glory to God!

This morning began the same way as yesterday. We awoke to many people waiting on us for prayer. They had set aside all their tasks to walk to our home to receive healing prayer. When we got to them, their expectancy was very high. Here's a couple that I prayed for:

A woman with two tumors, one on her throat and one on her side. They were both big. We had her put her hands on them so she could feel any movement. As we prayed, first the pain left and then she felt the tumors shrink under her fingers until they had totally disappeared. Wow.

A young Muslim woman had very poor eyesight. We told her it would be Jesus doing this. We prayed and her eyes partially opened up. After she understood that it was Jesus doing this, she prayed to receive Him and then her eyes just opened up the rest of the way. Glory!

There were a number of people with Typhoid. The symptoms were head pain, body weakness all over and joint pain. They all felt something leave them, all pains gone and strength came back to them. One of the women I prayed for twice with only slight moving, then we had her (as a Christian) pray for herself and command it to go and it left instantly.

Again more women with demons coming to them in their sleep and getting them to eat something and they wake up sick. We taught them of their authority, went thru deliverance and then prayed and they were all released.

Ok, we are off to a good start. Next on to the first village of 3 that we will visit. These villages are around the location of tonight's Crusade. All of these villages are 90% Muslim. We entered into the village and we could see the influence of the enemy in their lives, however, we brought the kingdom of God with us. I think there were only a few that we prayed for until after they received Healing, then they quickly confessed Christ.

There were marks of the devils work on the bodies of many. We saw burn marks about 1" in diameter on many bodies, especially on their legs. Most didn't know how the burn got there but they all had difficulty walking. One man's left leg and foot were all swollen and paining so bad he couldn't put any weight on his foot. This burn mark was about 2" diameter on his thigh. We prayed a few times and he was healed. Then he helped us with the next lady with interpretation and leading her in prayer to receive Christ.

Then they took us to a lady that came out of her house with a cane that looked like a tree trunk, it was so big. She had a young man holding her up on her left side while she crutched her right side. She sat down and we saw her leg was twisted and bent and in serious pain. But, when she lifted up her dress to just above her knees, there was the burn mark again. We broke that devil stuff off her, the team ladies prayed a few times and then this lady confessed Christ and was walking on her own when we left.

We prayed for more people that had that same burn mark on their thighs. All of them had problems with walking. All were healed.

Another lady with head pains and burning feet got prayer and immediately went into a trance. I watched to see where this was going, but after a few moments she came out and was healed.

Another Muslim man fell into a hole and busted up his leg real bad. There was a woman next to him getting prayer and started jumping to test out her healing. This man looked at her and said "you won't find me doing that!" Rev Kettor told him, watch, Jesus will touch you and you will jump. He said No Way! As different members of the team prayed for him, he began to experience healing, then he received the Lord. All of a sudden he started jumping, realizing that Jesus made him totally well.

Now this is weird, we had a few women that asked for prayer because they "talk too much!" Didn't quite understand that, but we prayed. The first woman just busted out in laughter and was overcome with the joy of the Holy Spirit. Then she told us that her husband had multiple wives, ok, now we understood better and prayed to help her. Now this Muslim guy has one of his wives that is a Christian and is going to pray for him. Watch out!

A mother brought her little boy almost 2 years old that had never stood or walked on his own. She was muslim and needed to see the loving power of God. Well, she did. We prayed and told her to stand the child on the ground and call the child to come to her. She did, the little boy stood and then took 3 steps right into momma's arms. Well, she received the Lord, no further discussion necessary.

Then we were taken into a house where a young man (soccer player) was lying on the floor recovering from surgery from a motorcycle accident. His foot was about torn off and bones

busted up and the surgery tried to put his foot back together. His hip was also knocked out of the socket and busted up and the hospital could do nothing with that and told him he would probably not have use of his leg again. Well, he had pretty serious pain in his body. We prayed and after a few attempts, all the pain departed him. Then we prayed for a creative miracle of a new hip. All of a sudden he was able to move his leg and swivel his hip. That would be the new hip that God just gave him!! Oh, his spinal cord was also damaged and had him bent over. God also fixed that. Then he tells us about pressure on his chest (that was probably the traumatic stress of this whole event). We prayed and that was removed. Then he tells us (and shows us) that he has a hydrocele. Something we've seen a lot of on this trip. Well, we prayed and he said that disappeared. This guy was flipping out at this point, very, very happy. His mother was watching this whole thing and that was the last thing she watched as a Muslim as the miracle of her son's healing brought her to Christ. It was powerful multiple miracles for this young man today.

An old Muslim guy wearing the beanie was led up, obviously blind. After prayer, his eyes were opened up and he said "Oh, a white man and he started laughing because he was so happy!" He asked to have Jesus in his life. He agreed that his religion could never do this for him.

Casey:

Today we woke up to another crowd waiting outside for prayer. They show up just as the sun is rising and just hang out until we come outside to meet them. The hunger and desperation for a touch from God is very great here, and their hunger paid off as God healed each one of them. The very first person I had prayed for was a young boy that was blind. After a short prayer he was able to see small small as they say. So I prayed again and his eyes were totally opened. What a way to start the day hu? Well, that and some coffee☺. The second person I prayed for was a girl that was a deaf mute and her healing came instantly and she was able to say Jesus very clear. The next little guy I prayed for was a young boy around three years old maybe. His mom had him on her lap and when I asked what they needed prayer for she just ripped down his underwear and pointed. Ok I could clearly see the problem was hydrocele. I don't know what causes this problem but it is very common here. So I prayed for this little guy and took the authority over that sickness. What happened next was real cool to watch. The swelling was going down right before our eyes I mean you could really see it happening. The mother watched in shock as her little guy was being healed by Jesus. Now I have prayed for hundreds of people but this was a first to watch the healing in slow motion. Pastor Instantly was standing right next to me and we just started to laugh not that this was funny, but every time we would pull up the boys underwear the mother would rip them right back down and continue to watch the swelling go away. This only took a few minutes for this boy to be totally healed and before long he was back playing with the other children.

We went to three villages today to do outreach ministry as we walked up and down the streets weaving through each village. We prayed in the streets as well as in their homes. We found that the salvations come way easier at the crusades for the Muslims at or in their homes. They all wanted to be healed by Jesus but most of them didn't want to receive Him. Although a few of them recognized what happen to them and just who touched and healed them. Those few gave their lives to Jesus right away. One of the first ladies that got healed received Jesus and she was the one that took us from house to house in the first village. She told all her friends and neighbors she was now a Christian and Jesus healed her so they need to do the same. She made a great cheerleader for us.

We prayed for a bunch of people today so it's hard to remember everyone that you pray for. The one that sticks out the most was the young man that was all busted up from a bad motorcycle accident. He was in a lot of pain and the hospital sent him home because there wasn't anything else they could do for him. Ahhhh but Jesus could and did as we watched as prayer after prayer this young man was getting better and better. At first he couldn't move and after the first prayer he was able to roll over and onto his side. His hip was dislocated and some kind of back injury. One broken leg and on the other foot the heel was all stitched back on. Ya it looked like it hurt and makes me glad I don't ride a motorcycle back home. When we left him he was totally pain free and was rolling over real easy, so we blessed him and prayed for a quick recovery.

Rev Kettor:

What impressed me so much this morning, people left their residences at very early in the morning to come to us for prayer. Because they had prepared their heart and mind for healing, they were instantly healed this morning. Muslims converted to Christ I also really enjoyed this morning. A double blessing of being healed of their sicknesses and receiving salvation.

I am so happy for is the team working with such unity, such oneness, such one mindedness. No one is working on their own. No murmuring, everyone happy, all willing to do whatever is necessary for this mission.

Another thing this morning we missed the road we were going to and entered the wrong village, but it was the right village where God wanted us. We saw such powerful miracles there. When we got to this village (Golodee town) we were accepted fully by the village momma and the village teacher. When they saw what God was doing, they both accepted Jesus.

A man that said he would never show emotion or jump up and down like some of the other people that were being healed, when he got healed from body pains, he jumped higher than anyone else. He said he just couldn't help it, he was so happy.

There were so, so many Muslims healed and saved today. Truly Jesus has been taking over these villages.

Then we moved to Mambo Town (village #2). There also when we entered the town, people were quickly receiving us, gathering around us to hear and see what God was doing. As soon as the first two people were healed, then everyone just started running to us. The first man that met us said that we should meet the town head before we pray for anyone. I said we do not need to ask permission to pray for people, so we are just going to pray. When the people got healed, someone ran to get the town head, he came back and asked for prayer for his sickness and he got healed!

Pastor Instantly:

The first thing that amazed me, at 6:15 am there were people all over outside out house waiting for prayer. Oh my God. They said that word on the streets was that we had extra power to bring healing. I told them, yes we do, we have the extra power of Jesus Christ. Many of them that were healed this morning, promised to live their lives for Christ after receiving Him.

Testimonies: 4 women with partial blindness were totally healed,

Two people had tumors on their bodies that just disappeared this morning, they were totally in shock

Many women for problems with legs, all elderly, all healed, and also body pains with lots of arthritis all over their bodies were totally healed, some for many, many years. Lots of chest pains and heart problems totally healed.

A child that had a hydrocele for the last 6 months watched it disappear today

Lots of women with stomach ailments were miraculously healed this morning

Walking for Jesus Outreach:

The places we visited today were muslim dominated, that is until we got there.

We saw 4 people, 2 completely blind and 2 partially blind had their eyes totally opened today. All of them were muslims and all received Christ. They were all totally overwhelmed with the power of God to heal them.

There were 6 people that could not walk for various reasons. A teacher had an accident and fell and busted up her left leg got her leg restored and was walking. Another lady woke up in the morning and fell. All of the people were muslims except for 1 christian. They all received Christ.

There were people with pains in their sides for many years. There were so many people with stomach issues and they were all healed. Many had back problems. A woman with back problems for 17 years unable to twist or bend was miraculously healed today.

There were many with arthritis all over their bodies, joints all over, that were jumping and twisting like little children after receiving their healings. Many with assorted body pains all healed.

THIS IS AMAZING: A WOMAN HAD BEEN PREGNANT FOR 2 YEARS AND 6 MONTHS, WITH NO SIGN OF LIFE IN HER WOMB. WE PRAYED AND THE BABY LEAPED IN HER WOMB AND STARTED MOVING FOR THE FIRST TIME SINCE INITIAL CONCEPTION. THIS IS AMAZING!

I saw a 9 year old child that was deaf and dumb since birth that received his hearing and was speaking on the outreach today.
