

## **Mission to Sierra Leone Pujehun Village Conference Day 1 5/13/2010**

**Tony:**

Thanks for your prayers. Wow, they are powerful and effective.

The people here in Pujehun are extremely thankful that I have come from so far. They said they all knew it was God sending me when they heard I was coming, as no one would ever choose to come here, only God could send them! They are very poor people materially, but very rich people in their relationships with each other. Their kindness already has overwhelmed me.

A side note. I found out when I got here that the site of last year's mission (Kabala) was a total blowout. They told me that recently, one year from the date we were there, the entire city celebrated its first year anniversary of when REVIVAL CAME TO THEM. And I am told that the Fire of God is burning brighter than ever and the Christian churches are growing like crazy and the Muslim population has greatly decreased. Glory, Glory, Glory to Our King!

The adventure continues as we again see the mighty hand of the Lord deliver us from every attempt of the enemy to stop this mission. Mechanical delays put us into Belgium after the time the only flight to Sierra Leone was supposed to leave. God held the plane on the ground for 2 hours to wait until I could get on it. Then we were to drive all night to the southernmost district of Sierra Leone to begin the conference at 9am today. Well, the car broke in the middle of a desolate mountainous area. Being pitch black, and on the equator, the stars were absolutely beautiful. After attempts to fix the car failed, I stood in the middle of the road to flag down the next truck that came by. Maybe one every half hour. I stood there and waived my white arm and the truck driver honked and yelled out "hello" as he flew by at high speed. Emmanuel said "he thought you were being friendly, that's not the way to stop a vehicle!" When the next one came I danced and waived properly and they stopped. It was a big truck full of cows going to market. They towed us into the next village. We got another car and he took us just so far as he had issues with the "spiritual darkness" of where we wanted to go. We got another car to take us all the way in and got there just in time to find out that they had spent the morning completing all the formalities with village dignitaries, etc and were now ready for us to start. RIGHT ON TIME. Yeah God!

Well, it looks like the darkness of this place got penetrated by The Light. The kingdom of God has invaded here. There were other LFJ Sierra Leone team members praying today, I hope to get some of the testimonies as there seemed to be a lot of stuff going on.

All denominations have come together, Catholic, Methodist, Pentacostal, Evangelical, AG, and many more. But here is the big one: For the first time ever, that I know of, there was a Jehovah Witness representative at this conference. Get this: This lady wanted to come to see what we

were all about. Before arriving at the conference, a huge snake appeared before her and knocked her to the ground. She got up and came, below is the testimony of what happened to her during prayer time.

Here's a little of what I saw Holy Spirit do during the prayer time:

- The Jehovah Witness Lady came up for prayer. She said she didn't know what she needed prayer for. Instantly the Presence of God came upon her and she fell to the ground and began vomiting. She stood back up and continued vomiting. We let her alone to the mercy of God. At the end she said that many "things" came out of her and she knew that she had been set free. "Now, I will serve the King Jesus!"
- A lady was in bad pain from the hip down for many years and the expression on her face was one of excruciating pain even trying to move one joint below her hip. We chased the pain around her torso a little bit, then came the moment of deliverance as total healing came to her. She stood there with tears of joy coming down her cheeks as she gave thanks to her God for what He had done.
- There were a number of blind cases (maybe 8 that I prayed for), from total complete black to partial. These were all Pastor's and church leaders. There was no lack of expression on their faces as sight came to their eyes. I felt with a couple of them that their blindness was viewed by their flock as a lack of faith and it was a troubling point for them. Glory to God, they will be in their churches this Sunday DEMONSTRATING and imparting the healing power of God to their people!
- A lady with "severe" neck problem that prevented her from turning her neck. In just a few moments, she was jubilating!
- A young man in the ministry has been suffering for the last 5 years with heart palpitations and racing of the heart. I could tell it was very distressing to him. In a few moments I watched the smile come over him as he began to worship his King and Healer.
- Very common to African nations is stomach problems as the water they drink is so tainted. Many healed today, but my favorite was a man that said he really liked to eat "pepper", that's what they call hot sauce. But for a long time, if he even smells it, his stomach turns inside out. Life without hot sauce, no, it just isn't right. I prayed and he felt something leave him and felt "cool" in his stomach. I told him to run home and eat something with pepper sauce right now. He was so excited and took off laughing.

- After the session a few people came to me with deliverance issues. Some really wild stuff and they were all so excited to see how easy it was to get free. This really is a perfect place to be sent. The confrontation between God's Kingdom and Darkness will be great and many lives will be impacted for the Kingdom of God.

These people are hungry and heaven is responding! Yea God!

### **Emmanuel:**

On the first day of the conference in Pujehun the Lord has started doing mighty things for the people of Pujehun district.

A lady had been healed from blindness today, after the introduction of prayer by Pastor Tony, in her testimony, there was a word that she have never heard, that is faith is risk. With that statement, her spiritual eyes were opened; also the physical eyes were opened too. She said that one day she was sleeping, somebody put sand in her eyes and from that day she lost her sight, but she praises God that the Lord healed her today.

A lady with the spirit of infirmity was healed today by the Lord, in her testimony she said that she had this pain for more than five years, at the end of every month she had pain all over her body, while we were praying for her she fell on the floor under the power of the Holy Spirit, during the time she felt something coming out of her like earth worms, before the meeting she could not be able to stand, but after the prayer, she said "I can feel no pain, the pain is gone and my body is restored!"

Brother Mohamed Sesay came to this meeting this morning. He could not turn his neck, he was undergoing serious pain, this pain had been on him for three weeks. In his statement he is blessed to be in this meeting and he has gotten his healing miracle.

A lady with chest and breathing problems for many years asked for prayer. Holy Spirit came upon her with a burning fire and she said she was on FIRE. The entire problem disappeared and she was totally healed.

A lady came with arthritis in her right arm and hand. Her fingers were totally curled and crippled and very painful. Instant healing was her portion today and oh was she happy.

I prayed for 3 partially blind people and they were all totally miraculously healed.
