

Mission to Liberia, Africa 2009

Pastor's Conference Day 3, Saturday, November 7, 2009 Location: Brewersville

Tony:

Each team member carries a second bag of just clothes and bibles to distribute to the people. Today they brought all 250 pounds of new clothes to the meeting. They passed them all out to the people. They were so, so, thankful.

Last day of the conference, as they turned over the service to us, there was still the lingering Sweet Presence of the Lord in the atmosphere. As we just hung out there a few minutes I sensed that He wanted to sovereignly heal a few people. I asked each person to put their hands on the parts of bodies that needed restoration. We spoke to that need, and then asked for those that had received a touch from the Lord in their bodies to come forward. Four people came up and then began to testify of the miracles they had just received. A couple of them needed a little more prayer to finish it off. As we began to pray many, many others just began to come up. In a matter of minutes we were surrounded by people wanting to be healed. Absolutely nothing was moving! I sensed in my spirit that this was not what Holy Spirit wanted at this time. All members of the team were experiencing the same thing. We all felt very strongly that we needed to stop praying and move on. I am so grateful for our growing relationship and dependence on Holy Spirit, as He leads us.

We moved into teaching on dreams. The people were all over it, the intense look of hunger to know more was on all their faces. We began to have some of them share recurring dreams they were having, without any knowledge of what they meant. We then gave interpretations as the Holy Spirit led. Wow, the revelation was flowing like a river. We could easily have gone on ALL DAY as there were so many that wanted interpretations. It was wonderful.

We then asked if they wanted a break or if they wanted to go right into impartation prayer. They all shouted, "Keep going, keep going!" These people are so hungry, we could go all day and it wouldn't be enough.

For the next couple of hours we imparted the anointing and prophesied over every one of the pastors. Then there were still hundreds of church workers and ministers that wanted impartation, so we made a huge tunnel of pastors and passed all the remaining people thru the tunnel to have hands laid on them. Occasionally, there would be a few sick people that slipped in from the outside that were in line and they stopped in front of us for prayer. God is so good.

At the end we asked for those that wanted to give testimony of how they were touched by God today. Now this was cool, there is so much that Holy Spirit was doing that we didn't know about: here are some of the testimonies:

- One of the pastors that had just received impartation prayer said, "as soon as I received the anointing, I heard the Lord say to me "just obey, just obey!" Then I turned around to go back to my seat and I saw a lady that I felt Holy Spirit saying to go to because she needed healing," I went up to her and asked and she said yes, I am scheduled to go into the hospital tomorrow to have surgery on Monday, I have been for 10 years unable to bend over because of damaged vertebrae. This pastor prayer for the woman and she was instantly healed. She stood before everyone jumping up and down and doing deep knee bends. The place erupted in praise!
- Another woman said she had a serious problem with the bones in her feet and it was extremely painful to even walk. She said God touched her in her seat and she demonstrated the healing by jumping up and down and pounding on her feet. Hallelujah!
- Another woman came nearly blind for many years. She said it was like a dense film over her eyes. She said that when we asked for people to put their hands over the parts of their bodies that needed healing, she did that. And when she removed her hand, her vision was absolutely PERFECT! Yea God!
- Another lady saw the crusade banner in town and heard the voice of the Lord tell her to go to the conference and He would heal her. So she just

showed up today, sat in the crowd and God healed her of a long time disability sitting in her seat.

- Another lady took the microphone and began to sing praises unto the Lord. She said that she suffered with a terrible stomach ailment for many years and today it was just lifted off of her. She sang and wept tears of joy for what God had done.

Casey:

Well today was our last day of the Pastors conference and that means only one thing... Impartation time! Well, it started out with an awesome time of worship. The worship team is the same team that we had last year when we were here. They are going to be with us for all of the crusades too so that is going to be great. By the way, they all say hi to the team that came last year. When worship was almost finished you could feel that the Holy Spirit was doing something. Tony asked for those who were being touched by the Holy Spirit to come up front. A few came but everyone that needed healing started to come up front to. We started to pray for them and got nowhere quick. Well it turned out to be an excellent demonstration on how to follow the leading of the Holy Spirit. It didn't take long to figure out we missed it so Tony used this to teach them on how to follow Holy Spirit and to let them know it's ok if you miss it . When that was over Tony moved into teaching on dreams before we moved into impartation. The impartation time took a while as we each prayed for every Pastor one at a time. That line started to grow as well; they are just so hungry here and want everything we can give them. So I can't really blame them for that. Hunger is a good thing. When we finished praying for the Pastors we had them form two lines to make a fire tunnel to help us pray for the rest of the people. That still took about an hour there were a bunch of people here today. It was a lot of fun as always. When we were all finished we went back to our house for dinner. They had sweet and sour chicken rice and fried shrimp, ya I guess you could say it was real good they are treating us like kings wow. Thanks again to everyone that is covering us in prayers. Blessings 😊

Harvey:

Ditto to what Casey said. There is not really much else to add other than at the end they had a bunch of folks come up and give testimony of what God did in their lives so I did get a little video of testimonies. Thanks to all of the prayer warriors! Later 😊😊😊😊😊😊😊😊

Brian:

This was the last day of the pastor's conference and Tony was teaching on dreams and visions. Right after worship was over he felt that some people were being touched by the Holy Spirit and told them to place their hands on their bodies where they needed healing, And after he called up the people who felt they had received a healing to give testimonies. Four or five people came up to give testimony of their sovereign miracles and before they could speak other people started pouring up that just wanted healing. You really can't blame them as many had seen or heard about all the miracles that happened yesterday. They have no money at all for doctors and cannot afford even a bottle of ibuprofen as many of these people live on less than a dollar a day U.S.

Harvey was standing beside me and we both looked at each other as to say "Oh well, this is not what people were called up front for, but we might as well get started." The first person I came to was a woman with pain in her upper left arm and left knee. I had to persist a bit, but she got healing. I turned to my left and a woman was holding a little girl who turned out to be six years old, but the children are a lot smaller here than in the states. She said that the little girl could not talk, but could hear. So I went after a dumb spirit. It was still very noisy from the huge speakers from the sound system they were using, so I moved up back where it was less noisy to be able to hear and talk to the mother. I was feeling that if maybe I could spend a little time with this girl maybe I could see a

breakthrough the same as yesterday with the epileptic girl. I found out that the little girl had gotten sick a couple of years ago and also could not walk, but I had also noticed that the girl did not like me to touch her and rolled her eyes around a lot while I tried to put my hand on her head. I was thinking that this little girl had a demon or demons. More to come on this on later...
