

## Some Departing Comments from The Uganda Mission

Some of the immediate effects of this move of God:

- After we had been in a church, the next week people that had split off from the church before in an improper way came back the next Sunday and openly repented and sought forgiveness and asked to come back into the fellowship.
- The places that we have been in, **it is reported that The Presence of God is lingering there and people are just coming to stand in His glory.**
- Pastors from the villages are reporting that the very next day after we have had crusade there, they, and others in the churches, are going out and looking for sick and demonized people. They are finding them and the same anointing is upon them and revival is continuing. One pastor told us of the village maniac (insane person) that he went to and he was completely made whole and is now planning his new life. And another of the blind continuing to receive their sight.
- One older Christian man (not a church leader) that has been following us from village to village, who speaks perfect English, spoke to me on our last night of ministry. He said, “I have been here all my life and the missionaries that have been to our villages have been few and some have brought teaching and preaching and medical supplies, BUT this time, The Spirit of God has brought Real help to His people, Real fire! There is Real transformation among many people and our villages are now being transformed. The talk is now of Jesus and many are going to the churches. I knew God had remembered us, even before I heard you, because I heard that you come at your own expense and leave your family and church and work to bless a people that no one but Jesus seems to care about. We will pray daily that God greatly blesses all that He has given into your hands so that you may come back to the many more villages of this Nation.”  
We are humbled!
